Subject: Microsoft Settlement

I'm writing to express my dismay at the proposed settlement which I believe will do little to curb the negative impact that Microsoft's monopoly has had on the computer software industry. I find the proposed remedies weak, and with little prospect of strong enforcement. Microsoft should be required to release all information regarding its file formats, should be required to have uniform terms for all OEMs not just the 20 largest, and its restrictive licensing which keeps Microsoft products from running on competing operating systems should be eliminated.

Sincerely,
-mike mchenry
